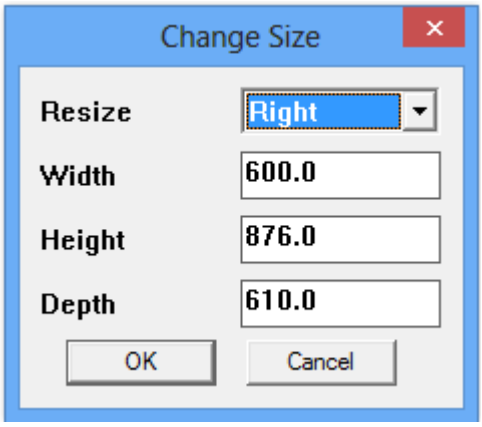
Resize

The Resize Component Dialog allows you to quickly change the dimensions of any component within your Sketchup model.

Usage:

- single component



The Resize attribute is only applicable to the Components width.

Options are:

- Right
- Width is changed on the Right
- Left
- Width is changed on the Left
- Both
- Change in width is split between the left and right ends
- N/A (when sizing is not allowed for the component selected)

Width, Height and Depth measurements:

- measurement are shown in the default unit of measure for your model.
- You may enter other measures by adding the symbol (EG. 12", 100mm, 1'...)
- ***Watch the headings***. CabinetSense may append "(fixed)" to any of these which means that the particular component that you are resizing does not allow a change in that particular direction.
