Change Door/Drawer Front/Panels

This dialog allows you to change several different aspects of the construction methods of a Door, Drawer Front or Panel.

Usage:

- Multiple Components

The screenshot shows a dialog box titled "Change Doors" with a close button (X) in the top right corner. The dialog contains a list of settings for modifying cabinet components. The "Component" dropdown is set to "All". Below it are "Position" (set to "All"), "Style", "Handle Type", "Profile", "Arch", and "Grain Direction", all of which are currently empty dropdown menus. At the bottom of the list are five text input fields for "Left Stile Width", "Right Stile Width", "Top Rail Width", "Bottom Rail Width", and "Mid Stile/Rail Width", all of which are currently empty. At the very bottom of the dialog are "OK" and "Cancel" buttons.

Component	All
Position	All
Style	
Handle Type	
Profile	
Arch	
Grain Direction	
Left Stile Width	
Right Stile Width	
Top Rail Width	
Bottom Rail Width	
Mid Stile/Rail Width	

Component Options: Select the type of component to change

- Door
- Drawer Front
- Panel

- Except Panel
- All (default)

Position Options: Select the position with the cabinet that the component must reside in

- All
- Only Top
- Except Top

Style: Select the type of door/drawer front/panel that you would like

- No Change (default)
- Slab
- 5 Piece

Handle Type: Choose what kind a Pull you would like.

- No Change (default)
- None
- Knob
- Handle

Profile: Choose what kind of Profile you would like to assign

- CabinetSense will display a list of Profiles available for you to use

Arch: Choose the type of arch you would like to use in your profile

- None
- Full
- Half

Grain Direction: Choose the grain direction that you want

- No Change
- Width
- Height

Stile and Rail Widths:

- The default unit of measure is the models unit of measure
- You can enter other units of measure by appending the appropriate symbol (EG. 1", 1cm, 10mm...)
- You can enter a static value (35mm) that you want the width to be or you can enter an amount to change the existing width by (+10, -15....)
