5-Piece Panel

	<div>----- Panel -----</div>
Inset	<div>6 mm</div>
Columns	<div>1</div>
Rows	<div>1</div>
Thickness	<div>19 mm</div>
Mid Rail/Stile Width	<div>60 mm</div>

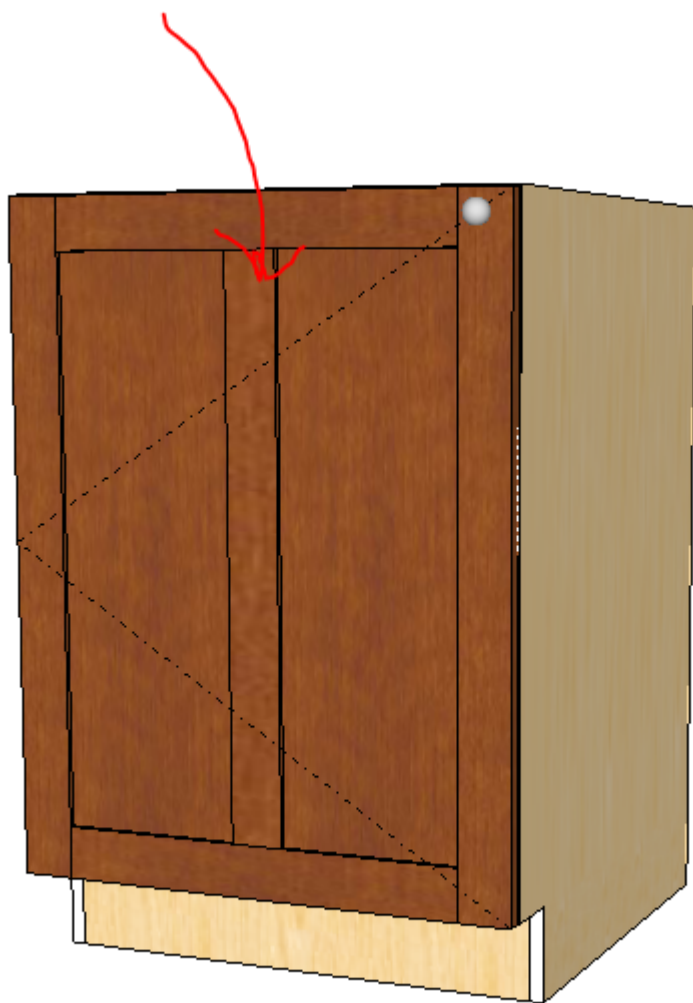

These properties control the construction of the panel of your 5-piece door, or drawer front.

Inset

This property is used for visual identity only and serves machining purpose. The panel will be inset amount from the stile and rails on both the front and back.

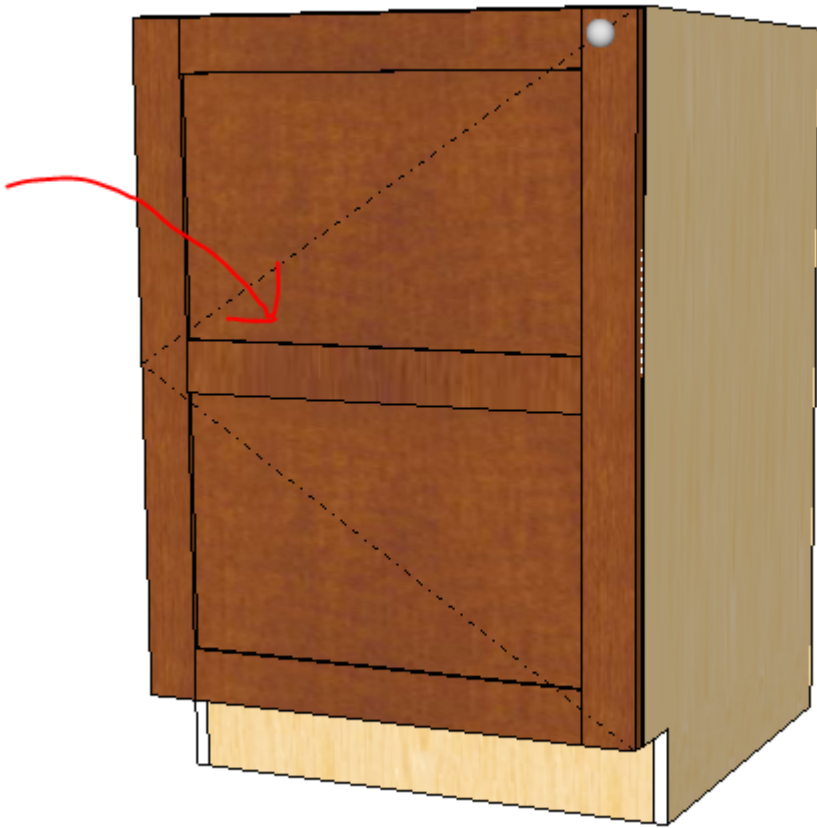

Columns

The number of mid-stiles to use in the door, Choices are from 1 to 5.

Rows

The number of mid-rails to use in the door. Choices are from 1 to 6.

Thickness

The actual thickness that you will use to mill your panel.

Mid Rail/Stile Width

The width of your mid stile and rails. By reducing the width, you can use it to effect lite panels.
