Reconnect

The reconnect option reviews the selected internal cabinet components (drawers, doors, partitions, shelves...) and determines if the boundaries for any of the objects need to be changed. If changes are detected, the component is reconnected to the new boundaries and a redraw occurs.

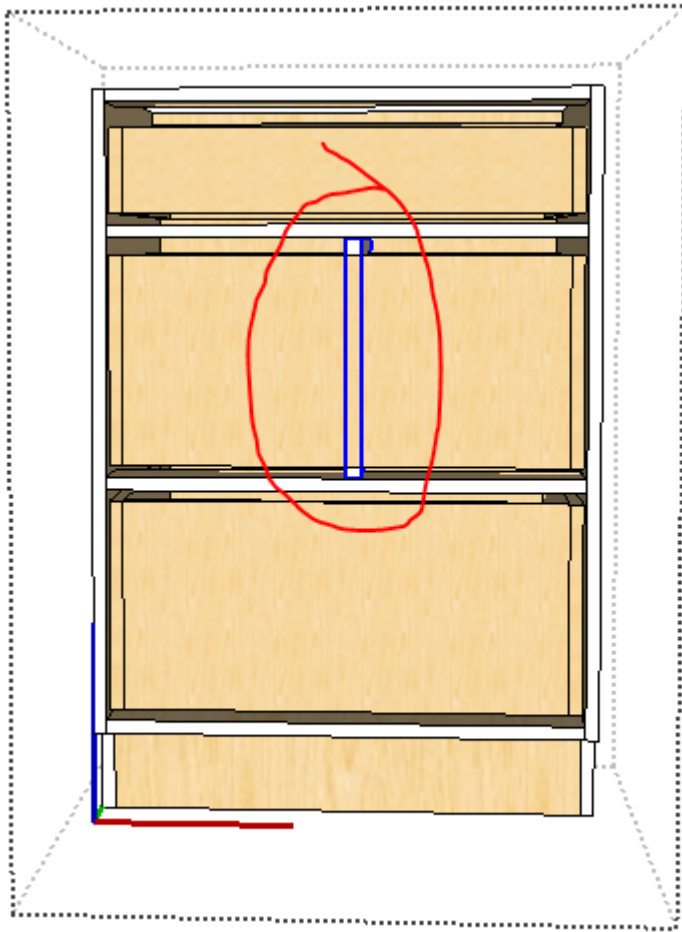

Usage:

- Multiple internal components

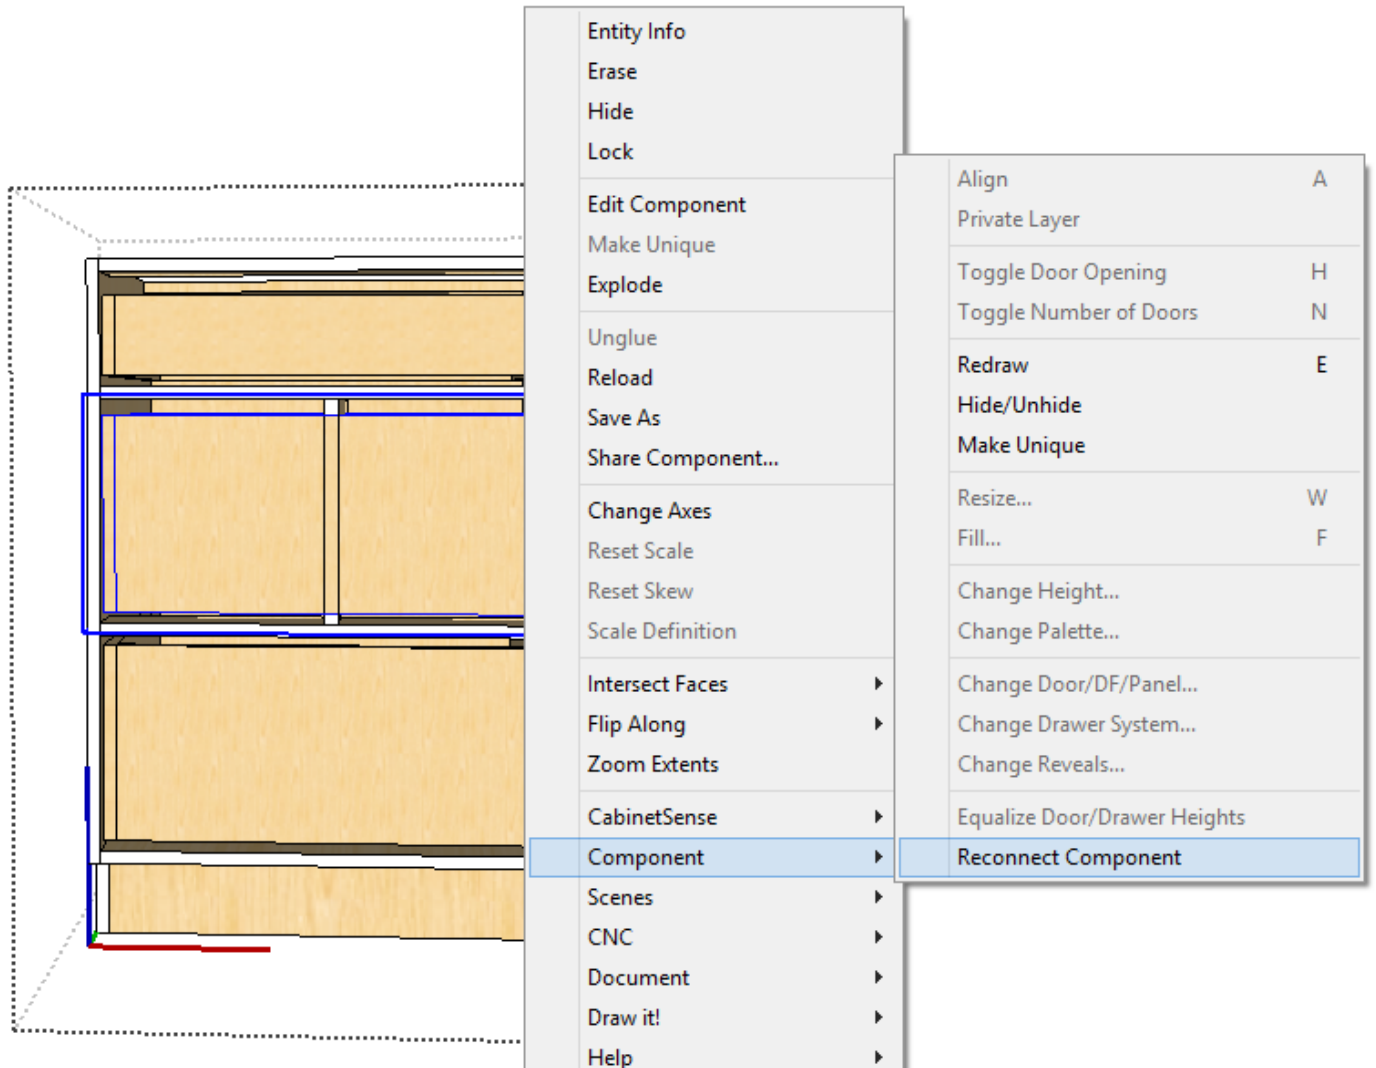

... Example ...

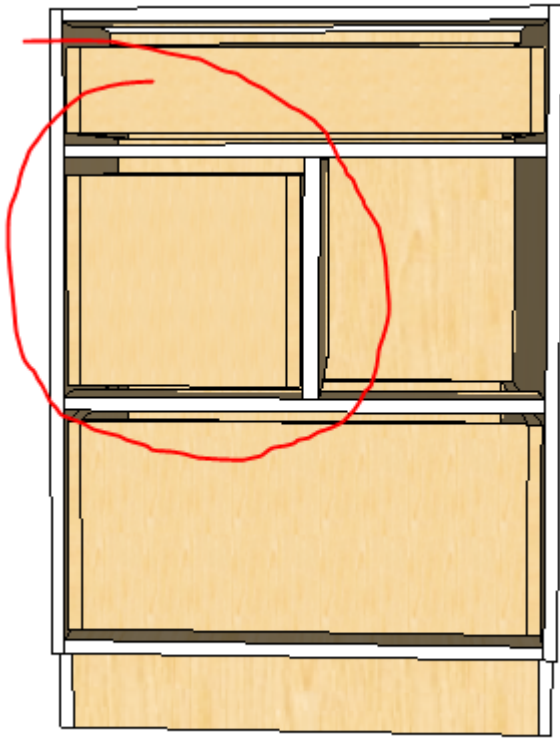

In the Following image, I have placed a partition in the middle of the second drawer. CabinetSense cannot be sure which opening you want to place the drawer box, so it leaves it under your control.

... Request a reconnect...

... After ...
